A post-baccalaureate plan must be developed for each post baccalaureate student prior to registration to determine which courses need to be taken to fulfill academic requirements established by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Once the plan has been developed, it is the responsibility of each student to see that all necessary courses are completed. Application for entry into a dietetic internship or pre-professional practice program can be completed after these academic requirements are fulfilled and verified by the program director. This plan is non-degree seeking, as such, students on international visas requiring a degree (including but not limited to F-1 and J-1) are not eligible for this plan.
